Infraestructures del Transport Aeri

Sequencing of arrivals & Compliance to altitude constraints

Àlex Ramonjoan

alex.ramonjoan@upc.edu

October 2026 – Version 1

Escola d'Enginyeria de Telecomunicació i Aeroespacial de Castelldefels

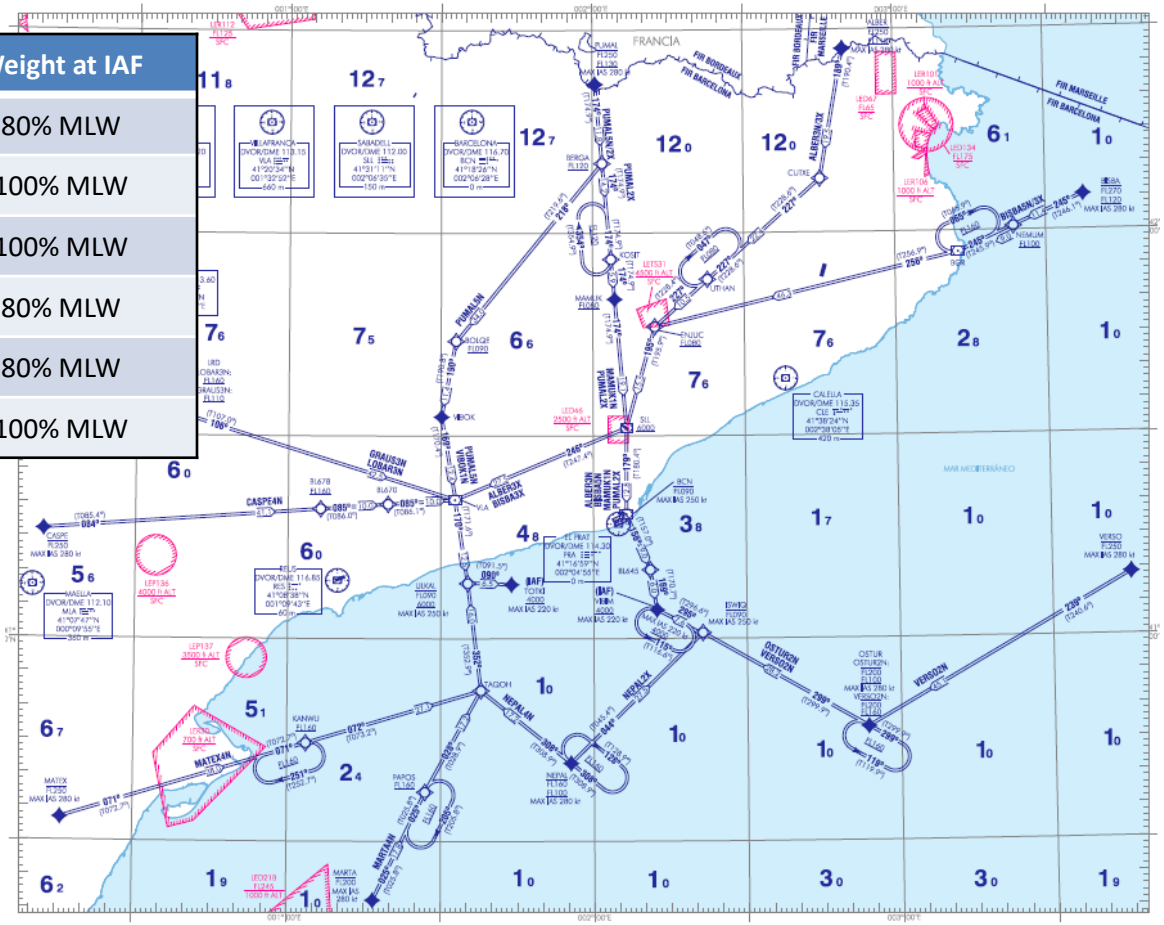

UNIVERSITAT POLITÈCNICA DE CATALUNYA

Goals

- To analyse two sequencing scenarios considering simultaneous CDO-based operations in multiple STARs from LEBL's RWY 24L.
- To check CDO compliance to STAR altitude constraints

Aircraft type	STAR	Weight at IAF
B767-300ER	ALBER1Z	80% MLW
B737	PUMAL1Z	100% MLW
B777-300	MARTA3Z	100% MLW
B767-300ER	MATEX3Z	80% MLW
A319-131	LOBAR2W	80% MLW
A320-212	CASPE2W	100% MLW

SoW v1.2!!!

Check [ENAIRE's AIP]

Sequencing Scenario 1

Simultaneous arrivals at STAR entry points

- All aircraft arrive at STAR entry point at **11:45:00 AM**
- Discuss convenience of this scenario and propose pre-tactical and/or tactical actions to achieve a more optimum scenario

Aircraft model	STAR	%MLW IAF	Dist. STAR entry WP to IAF [km]	Alt. at STAR entry WP [m]	Time from STAR entry WP to IAF [s]	ToA IAF	Seq. Order	Sep. to previous at IAF [s]
B767	ALBER1Z	80						
B737	PUMAL1Z	100						
B777	MARTA3Z	100						
B767	MATEX3Z	80						
A319	LOBAR2W	80						
A320	CASPE2W	100						

Sequencing Scenario 2

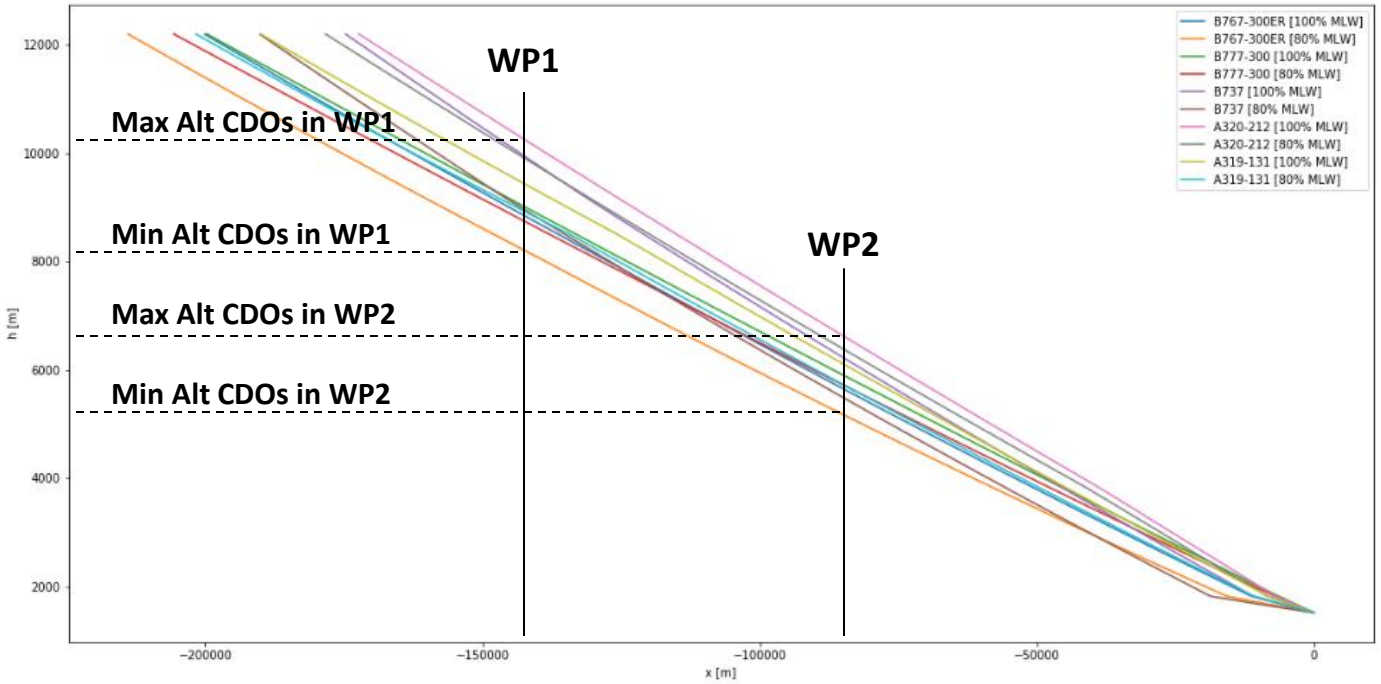

2-minute fixed separation at IAF

- Sequencing order must be maintained
- Discuss pros and cons of this scenario

Aircraft model	STAR	Weight at IAF	ToA IAF Scenario 2	Applied delay	ToA STAR entry WP Scenario 2
B767	ALBER1Z	80			
B737	PUMAL1Z	100			
B777	MARTA3Z	100			
B767	MATEX3Z	80			
A319	LOBAR2W	80			
A320	CASPE2W	100			

CDO compliance to STAR altitude constraints

- Take into account all 5 aircraft models and 2 weight constraints at the IAF (100% MLW and 80% MLW) → **10 trajectories**

- The analysis must be done for **all WPs composing the 6 STARs used in the previous analysis**.

WP1 organisation

17 September	KO + Speed minimum RoD	Literature review
24 September	Simulator (I)	
1 October	Simulator (II)	
8 October	Simulator (III) + Sequencing	
15 October	Sequencing + STAR altitude constraints + Report draft review	

WP1 report deadline -> **5th November at 23:55**

Thank you!!

Gràcies!!
